PROFESSIONAL SUMMARY

Software Engineer with 12 years of expertise across software quality and engineering, spanning the healthcare technology and e-learning industries. Proficient in building and maintaining applications utilizing React, TypeScript, and JavaScript. Brings a unique, quality-first perspective specializing in robust API integrations, structured backend data relationships, and stable test framework architecture. Adept at leveraging modern AI-assisted development workflows to accelerate feature delivery while ensuring high-performance, maintainable code.

- **Languages:** Javascript, Typescript, HTML/CSS, SQL (MySQL)
- **Frameworks & Libraries:** React.js, Node.js, Angular, Bootstrap, AJAX
- **Testing & Automation:** Cypress, Postman, Selenium, Protractor, Gherkin, LambdaTest, WCAG/Accessibility Testing
- **Tools & AI Assistants:** Cursor, Claude Code, Visual Studio, Webpack, Babel, Swagger, XML, JSON
- **Cloud & DevOps:** AWS, Docker, Terraform, GitLab, GitHub, Azure DevOps, Git
- **Data & Analytics:** BigQuery, Datadog, Microsoft App Insights, Mouseflow, Google Analytics, LogDNA, Sentry
- **Product & Services:** HL7 FHIR, Auth0, Contentful, Iterable, Osano, Freshpaint, Jira, Zephyr, Confluence, Coda
- **Methodologies:** Agile/Scrum, SDLC

EXPERIENCE

Nov. 2024 - June 2026

AI Software Engineer - Solera Health

Phoenix, AZ (Remote)

- Designed and engineered a standalone utility and third-party API service integrations using **TypeScript** and **JavaScript** leveraging **AI-assisted development tools (Cursor/Claude Code)**, expanding core platform capabilities and unblocking the successful onboarding of a major enterprise client.
- Led the architectural migration of a legacy data configuration model to a modernized, decoupled internal structure, coordinating a phased rollout strategy that ensured zero user downtime.
- Architected backend relational data models to support nested hierarchical organization structures, enabling complex client configurations while establishing reusable modules that reduced engineering effort for future client onboards.
- Owned the end-to-end delivery of a major program transition from development through production launch, managing deployment pipelines via **Azure DevOps** to ensure a seamless release with zero post-launch rollbacks or hotfixes.
- Refactored and stabilized the core automated testing framework using **Cypress**, eliminating flaky test instances to accelerate CI/CD pipeline cycles by preventing unnecessarily failing and stuck builds.

Aug. 2022 – Nov. 2024

Senior QA Analyst - Solera Health

Phoenix, AZ (Remote)

- Developed and managed comprehensive **Postman** collections to establish a robust backend API testing framework covering validation, regression, and smoke testing scenarios.
- Played a key role in the transition from manual to automated testing by auditing the manual suite and engineering a daily **Cypress** regression test framework, maximizing CI/CD test coverage.
- Authored and updated documentation for automation coverage.
- Conducted live end-to-end testing with clients of varying scales to ensure system compatibility and seamless transitions.
- Accelerated production issue resolution by leveraging **App Insights** and **Mouseflow** to triage critical bugs and streamline cross-functional troubleshooting.
- Ensured multi-device performance and **WCAG/accessibility compliance** by executing rigorous cross-browser and end-to-end user compatibility testing.

Sept. 2021 – July 2022

QA Engineer II (Team Lead) - Olive AI

Columbus, OH (Remote)

- Orchestrated large-scale release management operations, leading to multiple successful releases.
- Managed QE operations on 3 different projects.
- Designed and executed merge request verification, smoke test, and regression test suites.
- Trained other QEs in standardization, Agile processes, and app functionality.
- Created technical documentation around QE processes.
- Implemented and enforced QE standards.
- Coordinated with Product to improve user experience and app performance.
- Worked closely with developers on stories to ensure that quality was of the highest standard.
- Led QE scrum rituals.
- Communicated quality, user experience, and app performance concerns and questions for each work item during backlog grooming sessions.

June 2021 – Sept. 2021

QA Engineer - ByteLion

Hunt Valley, MD (Remote)

- Designed, created, and maintained automated API test suite for Kroger/Ocado.
- Created, executed, and maintained manual test suite for Verdat.
- Managed QE operations within 2 different projects.
- Created detailed QA reports and testing plans.

EDUCATION

Graduation Date: May 2018

The University of Tennessee at Martin

Martin, TN

Bachelor of Science in Business Administration, CBGA, AACSB Accredited: Management Information Systems
Minor: Japanese

Achievements: Chancellor's Honor Roll

Travel Study: Japan | May-June 2016
