PROFESSIONAL SUMMARY

Software Engineer specializing in JavaScript and TypeScript, with experience developing and maintaining production web applications across frontend and backend systems. Experienced with React, API integrations, UI workflows, backend data modeling, and production delivery within healthcare technology. Brings a quality-first engineering perspective developed through extensive experience in automation, reliability, and production troubleshooting. Experienced in AI-assisted development using Cursor and Claude Code to accelerate delivery while maintaining high-quality, maintainable code.

- **Languages:** JavaScript, TypeScript, SQL, HTML/CSS
- **Web & Backend:** React, Node.js, REST APIs, Angular
- **Testing & Quality:** Cypress, Jest, Vitest, Postman, Gherkin, LambdaTest, WCAG/Accessibility Testing
- **AI-Assisted Development:** Cursor, Claude Code
- **Cloud & DevOps:** AWS (S3), Docker, Azure DevOps, GitLab, GitHub, Git
- **Observability & Analytics:** BigQuery, Datadog, Microsoft App Insights, LogDNA
- **Tools & Services:** Swagger, Visual Studio, HL7 FHIR, Auth0, Contentful, Jira, Confluence

EXPERIENCE

Nov. 2024 - June 2026

Software Engineer - Solera Health

Phoenix, AZ (Remote)

- Developed and maintained production web application functionality using **JavaScript** and **TypeScript**, including **React** components, API integrations, UI workflows, and bug fixes across legacy and modernized application areas.
- Designed and engineered a standalone utility and third-party API integrations using **TypeScript** and **JavaScript**, leveraging **Cursor** and **Claude Code** to expand core platform capabilities and unblock the successful onboarding of a major enterprise client.
- Led the architectural migration of a legacy data configuration model to a modernized, decoupled internal structure, coordinating a phased rollout strategy that ensured **zero user downtime**.
- Architected backend relational data models to support nested hierarchical organization structures, enabling complex client configurations while establishing reusable modules that reduced engineering effort for future client onboards.
- Owned the end-to-end delivery of a major program transition from development through production launch, managing deployment pipelines via **Azure DevOps** to ensure a seamless release with **zero post-launch rollbacks or hotfixes**.
- Refactored and stabilized the core automated testing framework using **Cypress**, eliminating flaky test instances to accelerate CI/CD pipeline cycles by preventing unnecessarily failing and stuck builds.

Aug. 2022 – Nov. 2024

Senior QA Analyst - Solera Health

Phoenix, AZ (Remote)

- Developed and managed comprehensive **Postman** collections to establish a robust backend API testing framework covering validation, regression, and smoke testing scenarios.
- Played a key role in the transition from manual to automated testing by auditing the manual suite and engineering a daily **Cypress** regression test framework, maximizing CI/CD test coverage.
- Conducted live end-to-end testing with clients of varying scales to ensure system compatibility and seamless transitions.
- Accelerated production issue resolution by leveraging **App Insights** and **Mouseflow** to triage critical bugs and streamline cross-functional troubleshooting.
- Ensured multi-device performance and **WCAG/accessibility compliance** through rigorous cross-browser and end-to-end user compatibility testing.

Sept. 2021 – July 2022

QA Engineer II (Team Lead) - Olive AI

Columbus, OH (Remote)

- Orchestrated large-scale release management operations, leading multiple successful releases across three concurrent projects.
- Designed and executed merge request verification, smoke test, and regression test suites.
- Trained QE team members in testing standards, Agile processes, and application functionality.
- Established and enforced QE standards while leading quality-focused discussions during backlog refinement and other Scrum ceremonies.
- Coordinated with Product and Engineering to identify and address user experience, quality, and application performance concerns throughout development.

June 2021 – Sept. 2021

QA Engineer - ByteLion

Hunt Valley, MD (Remote)

- Designed, created, and maintained automated API test suite for Kroger/Ocado.
- Managed QE operations across two projects, developing and maintaining test suites and testing plans.

EDUCATION

Graduation Date: May 2018

The University of Tennessee at Martin

Martin, TN

Bachelor of Science in Business Administration: Management Information Systems

Minor: Japanese

Achievements: Chancellor's Honor Roll

Travel Study: Japan | May-June 2016
